Claims 1-36

The inventions of claims 1-36 appear to involve an inventive step based on the documents cited in the ISR. Documents 1-4 do not describe the "point that an auxiliary sheet is disposed such that it covers a top sheet," "the point that an extension portion of an auxiliary sheet is formed so as to be upright at the wearer side," "the point of a urine pocket being formed in a bag shape," "the point that the structure is such that a top sheet is folded toward the side, and the end of such folded part has an opening," and "the point that the pocket is formed by folding the other end of the absorbent pad in the lengthwise direction"; nor are these points obvious to a person skilled in the art.
